

**CAN YOU LOOK LIKE YOU'VE BEEN
ROCK SOLID FOR 100 YEARS?
ABSOLUTELY!**

PALMETTO BANK | Headquarters Building | Greenville, SC

Architect | McMillan Smith & Partners, PLLC
Contractor | Harper Corporation

Architectural precast emulates limestone and travertine

Precast medallions and cast-in shapes and letterforms

Clever use of reveals and joint detailing hides panelization

PALMETTO BANK

Headquarters Building | Greenville, SC

THE HEROES

Architect: McMillan Smith & Partners, PLLC

Contractor: Harper Corporation

THE CALL

The challenge was to engineer a cost effective solution so each precast panel looked unique.

The owner needed a precast solution that didn't look like precast.

PERFORMANCE

Delivered on time and within budget. By specifying architectural precast, the architect was able to take advantage of local, regional materials, which allowed for a reduction in embodied energy and harvested materials.

“Metromont’s team embraced our idea and got their whole team on board. It’s one thing for sales managers to want to make architects happy, but to have the plant manager, the finishing crew foreman and engineers fully engaged is something else. Metromont was extremely cooperative - the project was a win-win for everyone.”

- K.J. Jacobs, AIA McMillan Smith & Partners, PLLC

PROJECT DETAILS

- Four level design
- 45,000 sq. ft. structure
- 27,000 sq. ft. of 6" thick architectural wall panels
